A BILL

To establish an Office of Specialized Instructional Support Services in the Department of Education and to provide grants to State educational agencies to reduce barriers to learning.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Reducing Barriers to
3 Learning Act of 2007”.

4 **SEC. 2. FINDINGS.**

5 The Congress finds the following:

6 (1) Interventions to increase students’ bonding
7 to school promote academic success by reducing bar-
8 riers to learning.

9 (2) Interventions that foster students’ engage-
10 ment in school have been shown to reduce high
11 school dropout rates.

12 (3) Interventions that strengthen students’ so-
13 cial, emotional, and decision-making skills also posi-
14 tively impact their academic achievement, both in
15 terms of higher standardized test scores and better
16 grades.

17 (4) Prevention and early intervention programs
18 that target elementary school-aged students who are
19 academically and socially at risk have been shown to
20 produce declines in special education referrals and
21 placement, suspension, grade retention, and discipli-
22 nary referrals.

23 (5) Students with barriers to learning, such as
24 low levels of resilience assets (such as high expecta-
25 tions and caring relationships at school), have lower

1 levels of academic achievement both in low- and
2 high-performing schools.

3 (6) Increasing students' engagement and sense
4 of community in the school produces reductions in
5 problem behaviors, increased associations with
6 prosocial peers, and better academic performance.

7 (7) School mental health programs improve
8 educational outcomes by decreasing absences and
9 discipline referrals and improving test scores.

10 (8) Students who receive social-emotional sup-
11 port and prevention services achieve better academi-
12 cally in school.

13 (9) While it is well recognized that mental
14 health directly affects children's learning and devel-
15 opment, in a recent study one-third of school dis-
16 tricts reported decreased funding for school mental
17 health services at the same time that two-thirds re-
18 ported increased need for such services.

19 (10) School counseling programs are essential
20 for students to achieve optimal personal growth, ac-
21 quire positive social skills and values, set appropriate
22 career goals, and realize full academic potential to
23 become productive, contributing members of the
24 world community.

1 (11) 70 percent of children receiving services
2 from speech-language pathologists make progress in
3 emergent literacy skills, and 75 percent make
4 progress in word recognition, an important compo-
5 nent of literacy skills; over two-thirds of classroom
6 teachers report that students receiving these services
7 show improved reading skills in the classroom.

8 (12) Use of creative arts therapies (including
9 art therapy, dance/movement therapy, and music
10 therapy) promote learning and skill acquisition (in-
11 cluding enhanced literacy skills), increased attention,
12 improved behavior, increased socialization, improved
13 receptive/expressive language, self-expression, and a
14 more positive attitude for learning.

15 (13) 97 percent of children in the United States
16 spend their days at school. Therefore, the school can
17 be an important site where health and education
18 risks (such as depression, absenteeism, and sub-
19 stance use) may be identified and timely interven-
20 tions initiated.

21 (14) Whole-school interventions using positive
22 behavior support have been shown to decrease be-
23 havior problems while improving academic perform-
24 ance, as measured by standardized tests in reading
25 and mathematics.

1 (15) Branches of Federal agencies need to re-
2 evaluate policies aimed at enhancing school-based
3 mental health and become more proactive in pro-
4 viding leadership to achieve integrated, collaborative,
5 and effective programs aimed at improving the men-
6 tal health of America’s children.

7 (16) 20 percent of the 53 million children at-
8 tending school in the United States will, at some
9 point, meet the criteria for a diagnosable mental ill-
10 ness at a level of impairment that requires some
11 type of intervention. Thus, there is the potential that
12 over 10 million children will need some type of help
13 to meet the goals relating to emotional well-being in
14 the No Child Left Behind Act of 2001.

15 (17) More than three-quarters of schools have
16 a coordinator of mental health and social services in
17 the school; nearly two-thirds of school districts have
18 a coordinator who serves this role; and one-half of
19 the States have a coordinator of school mental
20 health and social services. However, there is cur-
21 rently no person responsible for overseeing or pro-
22 moting these services and supports in the Depart-
23 ment of Education.
